

About Teach AG

The National Teach Ag Campaign is an initiative to bring attention to the career of agricultural education, get students thinking about a possible career in agricultural education, and support current agriculture teachers in their careers.

Agricultural education teaches students about agriculture, food, and natural resources. Through these subjects, agricultural educators teach students a wide variety of skills, including science, math, communications, leadership, management, and technology.

Some of the potential jobs for someone graduating with a degree in agricultural education include:

High school agriscience teacher

Ag literacy coordinator

Agricultural education professor

Farm business management instructor

2-year technical college agriculture instructor

Adult agricultural education instructor

Young farmer instructor
